Hunter North 757

The Human Biology Program is a multidisciplinary major that holistically analyzes the human species and human health through behavioral, cultural, social, and biological lenses. The Human Biology Program gives students an opportunity to pursue their interests across disciplines to become well-rounded scholars. Human Biology majors complete foundational core major requirements as well as their own course selections from their chosen track to customize their major according to their goals.

YOUR HUMAN BIOLOGY MAJOR

CORE MAJOR REQUIREMENTS*

*C- or above grade required in each core course

Human Species Requirement
(3 credits)

ANTHP 105
The Human Species

Biology Sequence Requirement
(9 credits)

...AND MORE!

ADDITIONAL OPPORTUNITIES

Graduate with Honors in Human Bio

- complete an internship or research experience for 3 credits before graduation
- at graduation, have a 3.5 major GPA and 3.0 overall Hunter GPA

Earn Credits for Internship/Research

- complete a hands-on internship or work with a Hunter faculty member in their lab
- meet with an advisor for more info!

Apply for the Human Biology CIE Career Prep Program

- access individualized academic and career advising until graduation
- secure paid internships and employment opportunities
